Emergency Radiation Emergencies - PHE Buy Nuclear Emergency: How to Protect Your Family from Nuclear Radiation, Fallout and Terrorism by Ken Larson (ISBN: 0595.0
A nuclear or radiological emergency might be an accident at a nuclear plant that will watch the levels of radiation and tell you what you should do to protect yourself. For short periods of time, sealing the room can help protect you and your family. Nuclear or radiological emergencies require preparedness and response to protect public health and safety, property, and the environment within their borders. Nuclear explosions can cause significant damage and casualties from blast, heat, and radiation, but you can keep your family safe by knowing what to do and being prepared. This is enough time for you to be able to prevent significant radiation. Make sure you have an Emergency Supply Kit for places you frequent and might have. This includes protecting yourself and your family, health effects and treatments, and radiation and pregnancy. Emergency preparedness is crucial.
